

Fidelity and Release-Readiness Audit: EMDR with Complex Trauma and Structural Dissociation

Status of this document: DRAFT. AI-assisted self-review, not an independent audit. It needs checking by the course director before any finding is acted on.

Audit date: 24 September 2026

Track: Advanced (post-Basic). **Task mode:** Audit only; no course file was edited.

Companion document: course-scientific-review.md, which rates 48 claims against their sources. This audit uses its findings and does not repeat them.

1. Readiness verdict

READY FOR CLINICAL REVIEW. Not a release candidate.

The course's structure is sound: - The trainer manual and all 314 slides match. - All 20 blocks are 60 minutes. - Case reveals are fully protected. - Specialist procedures are held at the declared depth.

Seven blockers stand between it and a release candidate (section 4): - two missing deliverables; - five scientific and citation corrections; - one conflict with a recorded approved decision; - missing DRAFT and status markings on the decks.

2. Course brief, filled from the supplied files

Field	Entry
Track	Advanced: "تدريب متقدم بعد التدريب الأساسي" (Day 1-4 title slides)
Title and focus	EMDR with complex trauma and structural dissociation. Clinical decision-making across phases 1-3
Brand	EMDR ARABIA
Course director	PENDING. Not named in any file
Audience and prerequisites	Clinicians who have completed Basic Training (stated). PENDING: how completion is verified, the licensing categories, and the participant number
Time and format	20 hours: 4 days × 5 blocks × 60 minutes, live online. Breaks outside the learning time (structure v2)
Faculty	A lead trainer (unnamed, credential PENDING); Assistant 1, Dr. Dina (chat, private messages, breakout rooms, wellbeing); Assistant 2 (timing, links, polls, attendance)
Practicum	None by design. Individual written case tasks, and demonstrations read aloud by the trainer. Directly observed practice per trainee: 0 minutes (calculated)
Depth: specialist procedures (CIPOS, Loving Eyes, EMD, Flash, IHD)	Depth 1-2, indications and limits only. Recorded in structure v2 ("الإجراءات المتخصصة بنعرف") ("دواعيها وحدودها بس")
Depth: RDI	Depth 1 (recognition and limits)
Depth: mastery-resource identification	Depth 3. A verbal demonstration only, with no bilateral stimulation (D3 S34, Task 13b)
Depth: parts-oriented work	Depth 1-3. The language of collaboration only; the Task 9 dialogue is read by the trainer; "no training in direct work with parts" (manual 2.4)

Field	Entry
Depth: cognitive interweave, dose adjustment, target selection, inverted protocol	Depth 2 (decisions in Tasks 14–18), plus a trainer-read demonstration in Task 18a
Excluded content	Bilateral-stimulation practice, procedural steps for specialist methods, direct work with parts, trauma processing
Sources supplied and access state	Full text: TTRD (2017), <i>Coping</i> (2011), Knipe (2015, 1st ed.). Excerpts: Leeds (2016) ch. 5, pp. 160–163, 215–220, 447–450; Shapiro (2018) pp. 220–222; <i>The Haunted Self</i> (2006) ch. 1. Bibliographic identification only: Carlson & Putnam (1993), Dell (2006), Manfield et al. (2017), SCID-D, TADS-I, ICD-11 (the WHO site is blocked here)
Weight of TTRD	Structure v2: the day sequence "follows the phase model of Steele, Boon and van der Hart (TTRD)". This is the primary framework source; it is stated as such, which is correct
Case record	"سجل الحالات v2" is the stated single authoritative record for Reem (R1–R13) and Tarek (T1–T12)
Accreditation or CE status	PENDING. No claim appears in any file, which is correct. No status statement appears either
Certificate wording	PENDING. None found
AI disclosure	Present in the trainer manual, participant manual and run sheet. Absent from all four decks and the case record
Release requirement	Clinical review by the course director (stated on every Word document)

3. Results of the nine checks

#	Check	Result	Basis
1	Scientific accuracy	Defects	48 claims rated: 40 supported, 3 confirmed by the course author, 2 outdated, 1 overstated, 1 misquoted, 1 citation error. No retracted sources (see the companion review)
2	Procedural fidelity	Pass with defects	EMD, CIPOS, Loving Eyes, RDI cautions, the inverted protocol, interweave-as-question and target order match their sources at the declared depth. The bounded exercise stays bounded: Task 13b has no bilateral stimulation and is explicitly "not RDI". The participant manual contains no procedural steps. Defects: F-02, F-11
3	Practical teaching completeness	Partial	Decisions are taught with observable markers: presence signs (D1 S55), capacity for a task (2.3), the four readiness decisions with review conditions (2.5), and target / dose / presence (4.2). Two frequent in-scope actions are named but not taught: orienting a client to the present when presence drops, and what goes in a safety plan (F-12)
4	Cross-document consistency	Pass with defects	All 314 slides match the manual's slide lists by number, type, title and order (script check). All 44 run-sheet slide references match. Defects: F-06 (block order versus an approved rule), F-15 (stale case facts in structure v2)
5	Case and reveal integrity	Pass	22 reveal markers (R2–R13, T2–T12) were traced through slide text, speaker notes and the participant manual. 0 appear before their scheduled block. The participant manual states and keeps "no case information, no task answers". Answer slides follow their task slides, and the run sheet forbids showing them early. Risk: the speaker notes carry model answers (F-21)
6	Timing	Pass	20 blocks × 60 = 1,200 minutes = 20 hours, matching the stated total. Every block table adds up to 60. All 22 on-screen task timing strips add up to their header. One strip is missing (F-13)
7	Language	Pass with minor defects	Eight key terms are used consistently across 6 files (for example, التشابك المعرفي, الذكرى المرجعية, قالب المستقبل, الانتباه المزدوج). One shortened term is ungrammatical (F-14). Register is split: Modern Standard Arabic in the manuals, Egyptian colloquial in the slides and notes. This looks intentional; confirm it suits a pan-Arab audience

#	Check	Result	Basis
8	Visual usability	Not performed	LibreOffice in this environment fails to open any file, even plain text, and no Arabic-specific fonts are installed. No slide or page was rendered
9	File integrity	Pass with defects	All 9 Office files open (zip integrity OK). No hidden slides. Every slide has speaker notes. No comments or tracked changes. RTL structure: 97–100% of paragraphs carry w:bidl, and all 138 tables carry bidiVisual. Defects: F-09, F-20, and the missing files in F-07 and F-08

What kind of check each was: - **Structural:** zip integrity, slide counts, hidden slides, notes, RTL/bidi XML properties. - **Textual:** slide-list comparison, run-sheet references, reveal tracing, timing arithmetic, terminology, status claims, depth leakage. - **Visual:** none.

4. Release blockers

ID	Defect	Why it blocks release
F-01	Knipe cited as the 2nd edition, but its chapter numbers belong to the 2015 1st edition	Wrong references in both manuals
F-02	IHD attributed to "Knipe ch. 14"	Unsupported attribution for a named procedure
F-03	RDI evidence misquoted (D3 S32)	Understates an evidence gap
F-04	Suicide-risk prediction wording is outdated (D1 S71, D2 S8, participant manual)	A safety-relevant claim that contradicts current guidance
F-06	Block order contradicts the approved rule in structure v2	Unresolved conflict with a recorded approved decision
F-07	The participant workbook (كُتَاسَةُ الْمُشَارِكِ, Tasks 1–21) was not supplied, and the run sheet says "محتاج رابط" (needs a link)	Every task depends on it
F-08	The pre-test/post-test (12 items) and its answer key were not supplied	Assessment alignment can't be audited

5. Defect log

Every patch below is proposed only. Nothing was applied (audit-only mode), so no retest has been done.
Retest result for all rows: pending, not patched.

ID	Location	Consequence	Governing source or instruction	Proposed patch
F-01	Trainer manual and participant manual sources for 2.2, 4.1, 4.2, 4.4	Readers can't find the cited chapters in the 2nd edition	Knipe (2015) title page, © 2015; Knipe 2nd ed. published 2018 (Springer)	Replace with: Knipe, J. (2015). <i>EMDR Toolbox: Theory and Treatment of Complex PTSD and Dissociation</i>. Springer. Keep: CIPOS and the Back of the Head Scale, ch. 13; Loving Eyes, ch. 11. Delete "ch. 14"
F-02	Manual 4.4 sources; D4 S53	A named procedure with the wrong provenance	Knipe (2015) has no "IHD" or "Inner Healing Dialogue"; ch. 14 is a case chapter. Ch. 11 describes therapist-guided "internal dialogue" between parts	Replace with the true source supplied by the course director. Until then: [VERIFY: IHD – author, edition, chapter]. Keep it at depth 1

ID	Location	Consequence	Governing source or instruction	Proposed patch
F-03	D3 S32 (slide and notes); participant manual 3.3	The evidence gap is understated	Leeds (2016) p. 160: "no controlled treatment outcome research"; p. 162: "no high-quality controlled research published on the full RDI protocol"	«لسه مفيش دراسات مضبوطة عالية» الجودة على بروتوكول RDI كامل» Participant manual: «ولا توجد حتى الآن دراسات مضبوطة عالية الجودة على بروتوكول RDI كاملاً (Leeds, 2016), pp. 160-162»
F-04	D1 S71; D2 S8 (slide and notes); participant manual Day 2 (the line «والمحاولات السابقة من أقوى المؤشرات»)	Learners may treat risk factors as predictive	NICE NG225 (2022): "Do not use risk assessment tools and scales to predict future suicide..."; Franklin et al. (2017), <i>Psychological Bulletin</i> , 143(2), 187-232; Leeds (2016) p. 126	«ومفیش مؤشّر لوحده بيتنبأ: D2 S8 بالانتحار بدقة؛ بنقيّم الاحتياجات والأمان، مش Leeds ف٥٠ NICE. Footer: «ولا يتنبأ أي NG225. Participant manual: مؤشّر وحده بالانتحار بدقة؛ لذلك نبني التقييم على الاحتياجات والأمان، لا على تصنيف الخطر إلى منخفض ومتوسط ومرتفع (NICE NG225, Franklin et al., 2017؛ 2022)»
F-05	D1 S29	A model is presented as a diagnostic fact	ICD-11 classifies these as separate disorders; skill rule: structural-dissociation formulations are models	«الطيف ده رؤية نموذج التفكير ICD-11 البنيوي؛ بيعتبرهم اضطرابات منفصلة»
F-06	Structure v2, line «قاعدة الكتلة (معتمدة): المهارة الأول ← الشرح...» versus the manual header, participant manual p. 1, D1 S7, and all 20 blocks, which run «الشرح ← المهارة...»	The built course departs from a recorded approved rule, or the record is stale	Course-director approval (structure v2)	Decision needed, not a text patch. Either confirm explanation-first and update structure v2, or re-sequence. Re-sequencing moves one skill slide per block and needs D1 S7, the manual header and the participant manual line 64 changed
F-07	Run-sheet links table: «كتراسة المشارك لكل يوم — محتاج رابط»	Participants have nowhere to write Tasks 1-21	Trainer manual: «إجابات مهام كتراسة المشارك (١-٢١)»	Supply four per-day workbooks: task prompts and response space only, no answers or unreleased facts. Then rerun the reveal check (section 3, #5) on them
F-08	Pre-test and post-test (Google Form links; key "في ملف مستقل")	Can't check whether 12 items cover 42 objectives, or whether the key is correct	Advanced track §9: map assessment to competencies	Supply the questions and key. Map each item to an objective ID and report coverage
F-09	All four decks; case record	Draft slides could be presented as final; AI involvement not disclosed where it shaped content	Skill §9; EMDRIA AI policy (June 2026), as good practice	«مسودة (DRAFT) للمراجعة الإكلينيكية» Add to the title slide of each deck until approved. Add the manuals' AI-disclosure line to the case record and to the D4 closing-slide notes
F-10	Participant manual cover; D1 S3-S4	Participants may infer credit or competence from attending	Skill hard stop 2; status is PENDING	«ورشة تعليمية متقدمة: مستقلة بعد التدريب الأساسي. لا تمنح اعتماداً أو شهادة ممارسة لأي من الإجراءات المتخصصة المذكورة.» Add a CE-credit line only if credit is verified

ID	Location	Consequence	Governing source or instruction	Proposed patch
F-11	D1 S13 (six things), D2 S38 (five capacities), D2 S67 (four decisions), D3 S52 (five criteria), D4 S20 (four dose dimensions, footer "TTRD"), D4 S39 (intervention ladder), D4 S47 (four things per procedure)	Trainer-built frameworks read as established protocol. D4 S20 attributes the four-dimension model to TTRD, which describes titration and fractionation (ch. 9) but not these four dimensions	Skill §6: label trainer synthesis; TTRD ch. 9	Add the footer tag «تجميع المدرب» to each slide. D4 S20 footer: «تجميع المدرب» مبنى على التدرج (titration) في TTRD ٩»
F-12	4.1-4.2 (D4 S9 «نرجعه الأول», T10 answer; 2.1 (D2 S10, S18 «خطة» (أمان مكتوبة»	The two most frequent in-scope actions are named without the content that makes them usable	Advanced track §1 and §5 (replace vague directions with supported actions); TTRD ch. 18 and App. C "My Safety Plan"; <i>Coping</i> ch. 1 ("Learning to Be Present") and ch. 2 ("Anchors in the Present"); Knipe ch. 13 (Back of the Head Scale)	(a) Add one slide to 2.1 listing the components of TTRD Appendix C: warning signs and triggers; ways to help myself (checking inside with parts, grounding in the present, distraction, self-reassurance); substitute behaviours; people to call; emergency numbers. [VERIFY: TTRD pp. 505–507]. (b) Add one slide to 4.2 with labelled illustrative wording for orienting to the present: noticing the room, the chair and the therapist's voice; checking the Back of the Head Scale for presence (Knipe ch. 13); then deciding. Label it «صياغة توضيحية، منش نص مُعتمد»
F-13	D1 S78 (Task 4)	The only task slide without an on-screen timing strip	Consistency with the other 22 task slides; notes give 1 + 5 + 3 + 2	Add: «قراءة 1 د ٥ كتابة ٣-٢ د ٣ يشاركوا 3 د ٥» تعليق المدرب 2 د»
F-14	D1 S21 (objective), S29, S41 and notes	Ungrammatical shortened term (feminine noun with a masculine adjective)	Consistency with «اضطراب الهوية التفككي» used elsewhere	Replace «الهوية التفككي الجزئي» with «اضطراب الهوية التفككي الجزئي» (3 slides and their notes)
F-15	Structure v2, Tarek column; sources line	Stale case facts if the file is reused: "emails he doesn't remember sending", "interrupted sleep", "neglect and violence from the father". Also lists Fisher as a source, but Fisher is cited nowhere	The case record v2 is the single authoritative record	Mark structure v2 «مُسْتَبَدَل في بيانات» «الحالتين؛ المرجع: سجل الحالات v2». Remove Fisher, or cite it where it is used
F-16	"المصادر" (sources) under every block	Claims can't be traced to a page. Blocks 1.1 and 1.4 rely only on «ملاحظات شرائح اليوم» «الأول القديمة» «التدريب الأساسي»	Evidence reference §2: one source-map row per consequential claim	Build a source map. Section 4 of the companion review already supplies pages for 45 claims. Label 1.1 and 1.4 as teaching-method content (trainer synthesis), not evidence
F-17	Objectives 2.2, 2.4 (x2), 4.4; unassessed objectives in 1.3, 2.4 and 3.1 (Task 11 is optional)	Four objectives can't be measured; three objectives have no task	Skill §7 (observable verbs); advanced track §9	Rewrite, for example: 4.4 «تحدد لكل إجراء» متخصص داعمًا وشرطًا وحدًا من الحالة المعروضة». Add a 3-minute check to 1.3 and 2.4, or remove those objectives. Make Task 11 core, or drop objective 3.1

ID	Location	Consequence	Governing source or instruction	Proposed patch
F-18	Content gaps: ISSTD (2011) guidelines; DES-Taxon and SDQ-20/SDQ-5; ICD-11 6B63; the debate over phase-based treatment for CPTSD; the progressive approach	Missing guideline and evidence context	Companion review, section 6	Director decision on which to add; each needs about 1 slide or 1 manual paragraph
F-19	Referenced but not supplied: the colloquial version of the trainer manual; «دليل التطبيقات»; the exit-form questions; «ملاحظات شرائح اليوم الأول القديمة»	Can't be audited	—	Supply them for the next audit round, or remove the references
F-20	Case record v2 and structure v2: heading styles carry no w:bidi (0 in styles.xml)	Minor: paragraphs are RTL through direct formatting, but new text added with the heading styles would be LTR	Deliverables §6: heading styles set to RTL	Set bidi on the Heading 1–3 styles in both files
F-21	Speaker notes in all decks contain model answers and trainer-only case interpretation	Sharing the .pptx files with participants would leak answers and later reveals	Skill hard stop 3; case record: «صفحات المدرب فقط»	Add to the run sheet and trainer manual: «ملفات الشرائح (pptx) ماتتبعش للمشاركين؛ لو فيه نسخة للمشاركين تبقى PDF. من غير ملاحظات وبعد آخر كشف» Confirm the current practice

6. What the audit confirmed as working

- **Reveal control.** Every fact about Reem and Tarek appears first in its scheduled block, and the participant manual contains no case data or answers. This is better protection than most course packs manage.
- **The trainer manual and decks are in lockstep.** All 314 slides match by number, type and title; all 44 run-sheet cues point to the right slides.
- **Depth discipline.** Specialist procedures stay at indications and limits. The resource demonstration is explicitly "من غير" BLS بالكلام بس; parts work stays at the level of language. The Day 4 closing slide states which procedures need separate training.
- **Timing is fully reconciled,** from each task up to the course total.
- **Safety provisions:**
 - content warnings with a five-second pause before sensitive reveals;
 - a named wellbeing assistant with a breakout-room route;
 - "no personal disclosure required";
 - camera-off and break permission;
 - follow-up with affected participants after each day.
- **RTL production.** RTL and bidi formatting in the Word files is structurally sound. It has not been checked visually.

7. Checks not performed

- **Visual rendering** of the slides and Word files: LibreOffice is broken in this environment.

- **The pre-test and post-test forms:** Google Forms is blocked here, and the key wasn't supplied.
- **The per-day participant workbooks:** not supplied.
- **ICD-11 wording from the WHO site:** blocked here; checked against published reproductions instead.
- **Arabic-validated versions of the screening instruments:** no literature search was done.
- **Facilitation check:** whether the online platform supports breakouts and polls as the run sheet assumes.
- **Independence:** this audit was carried out by the same AI system that wrote the companion review. It is not an independent audit.

8. Order of work to reach a release candidate

1. **Course-director decisions:** F-06 (block order), F-10 (status and certificate wording), F-18 (which content gaps to add), F-02 (the IHD source).
2. **Text patches:** F-01, F-03, F-04, F-05, F-09, F-11, F-13, F-14, F-15, F-20, F-21.
3. **Build:** F-07 (the workbooks), F-12 (two slides), F-16 (the source map), F-17 (objectives and their assessment).
4. **Supply for audit:** F-08 (the test and key), F-19 (referenced files).
5. **Re-audit the revised files:** reveal trace, slide lists, timing, and a visual render on a machine where LibreOffice or PowerPoint works.
